Class: FShapes FClass: FShapes Class Desc: This class provides various shapes for use within Flight Simulator. Headers: Header file for FShapes Class: FShapes.h Notes: Note for FShapes.h file: There is no current documentation for this class. A: FSpot is the name of the environment for FSX. So, this means there is no such thing as, "FSX-Studio class". It is possible to make a class for that, but I am not aware of such a thing.

Instead, you would create a class that extends FSX's FSpot, or FSpot's FSpot, or FSpot's FSpot. Q: No serialization for non-structural types in JSON.NET I am trying to generate a JSON for my output as below,

```
[{"id":"12","name":"chai"}, {"id":"13","name":"lion"}]
```

In this case, I am not interested in the id and name of the object itself. Instead I want to get the id and name of the JSON as shown in below snippet. [{"id":"12","name":"chai"}, {"id":"13","name":"lion"}] I am using Json.NET for this. You can try to use an anonymous type for your output as shown below. var list = new [] { new { id = "12",

```
name = "chai" }, new { id = "13", name = "lion" }, }; var serializedList =  
JsonConvert.SerializeObject(list, Formatting.Indented); var deserializedList =  
JsonConvert.DeserializeObject<>>(serializedList);  
Console.WriteLine(JsonConvert.SerializeObject(deserializedList)); Output: [ { "id":  
    "12", "name": "
```

04 Nov 2010 - Latest version now includes texture replacement for Flight Simulator X and 2004. The software covers a huge part of the planet... You can use any language, but if you want to use support for other languages, please , send us a support email in English. We will consider all requests and work with your request. All changes made to this software will only work if you are using the V3.x version. The software also works on newer versions but will not work on 3.x unless you purchase the full version.
