We have made the following changes to our pricing and availability: Starting on August 1st, 2017, Winclone will no longer be sold as an individual license (the single user license is now no longer available), and Winclone will be sold as a free update for Winclone 3 users, and an additional price for Winclone Enterprise/System Builder versions. In other words, our single user license is obsolete, and all licenses now require a \$19.99 upgrade fee to own the software. Our current license holders will be issued a legacy version of Winclone, where we will continue to support the license they have purchased, and guarantee the license will work with future versions of Winclone. This legacy license will not be supported after September 30th, 2017 and no upgrades will be possible. Legacy licenses and Winclone Enterprise/System Builder Edition licenses will be provided as a free update to all currently licensed users, and Winclone Pro and Winclone Standard licenses will be available at a price of \$19.99 through September 30th, 2017. This new pricing will take effect on August 1st, 2017. We do not have any additional plan to discontinue Winclone 3, nor do we have any plans to discontinue Winclone 10 at this time. We strongly encourage all users of our software to upgrade to the new versions of Winclone, and we will continue to provide support and enhancements for the legacy version of Winclone for as long as is reasonable. In addition to this, we are also offering a free trial version of Winclone, that includes Winclone Enterprise/System Builder Edition, Winclone Pro and Winclone Standard edition, for a limited time, which is
